Appl. No. 10/536,586 Amdt. dated June 22, 2007 Reply to Office Action of June 4, 2007

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

- (Original) A polynucleotide encoding mammalian Prickle protein, wherein
 the polynucleotide comprises a sequence selected from the following nucleic acid sequences of
 (1) to (4):
- a nucleic acid sequence that encodes the amino acid sequence of SEQ ID
 NO: 1, or a complementary sequence thereof;
- $\mbox{(2)} \qquad \mbox{the nucleic acid sequence of SEQ ID NO: 2, or a complementary sequence}$ thereof:
- (3) a nucleic acid sequence that encodes an amino acid sequence with one or more amino acid deletions, insertions, substitutions, or additions to the amino acid sequence of SEQ ID NO: 1, or a sequence complementary to said nucleic acid sequence; and
- (4) a nucleic acid sequence that hybridizes with the sequence of (2) under stringent conditions.
 - 2. (Original) A vector comprising the polynucleotide of claim 1.
- (Previously Presented) A host cell comprising the polynucleotide of claim
- 4. (Original) A method for producing a mammalian Prickle protein encoded by the polynucleotide of claim 1, wherein the method comprises the step of translating said polynucleotide.
- (Original) A fragment of a polypeptide encoded by the polynucleotide of claim 1, wherein the fragment comprises at least eight amino acid residues.

Appl. No. 10/536,586 Amdt. dated June 22, 2007 Reply to Office Action of June 4, 2007

- 6. (Cancelled)
- 7. (Original) A nucleotide chain that encodes the polypeptide fragment of claim

5.

- 8. (Previously Presented) A host cell comprising the vector of claim 2.
- 9. (Cancelled)
